

Our company, which today boasts almost thirty years of history, began working in the biomechanical sector specializing in high-technology superficial treatments, principally on screws for surgical use.

Subsequently, our work diversified with our entrance into the chemico-pharmaceutical sphere, concentrating on the development of innovative acrylic resins for orthopedics. TECRES is ISO 9001 and ISO 13485.

It also has ministerial authorization from over 40 countries to sell its products abroad.

Tecres has always focused on research and development of bone cement - and the history of the company since its foundation bears witness to our emphasis on innovation from the outset.

THE ONLY "ALL IN ONE" CEMENTATION SYSTEM

The unique, **completely enclosed** and **odourless** system with **pre-dosed** liquid and powder components.

By introducing the 3:1 powder and liquid mixing proportions, we were the first ever in the O.R. to supply a less toxic cement with a **lower polymerisation temperature** and extremely low porosity.

THE FIRST AND ONLY FULLY-AUTOMATIC BONE CEMENT MIXER

Thanks to CEMEX SYSTEM MIXER, it is possible to achieve **perfect mixing** in every procedure, while retaining total process **sterility** and ensuring **the best possible cementation**

Distributed in the UK by

Exactech United Kingdom is a subsidiary of Exactech Inc. It was set up in 2005 and has been committed ever since to work with surgeons, offering them a dedicated service and innovative solutions to improve their patients' quality of life.
